

Rwanda Tours - Important Tips

Description

Rwanda Tours - Important Tips

The Volcanoes area is located at an altitude of over 2,400 meters above sea level. It is extremely chilly in the early mornings and evenings - warm clothing is therefore necessary. While trekking, it can rain unexpectedly ? it is necessary therefore to have:

- Water-proof clothing (jacket, with hood + trousers)
- Water-proof Zip-Lock bags for Cameras/Film/Passports/Money, e.t.c.
- Hand Gloves (warm and water-proof), to keep hands off from rain and dripping vegetation; as well as protect from stinging nettles
- Hiking boots - with good mud-grip are most appropriate (shoes/boots of clothing material will certainly become wet and uncomfortable)
- Gaiters ? to protect your trek trouser legs and boots against mud/wetness
- Sunglasses are not necessary during the trek
- Any valuables (carried on the person and not necessary during the trek), may be entrusted with your driver-guide for safe-keeping for the duration of the trek
